

Stylista WP Theme

The Stylista Theme is a WordPress Theme suitable for fashion websites, make-up artist shops, clothing line, hair stylists and other fashionista!

Stylista WP Theme was developed with Reverie (a theming framework for WordPress)

## Features

- Responsive - screen, tablet and mobile
- Customize options to Upload logo and favicon
- Elementor page builder to help build or layout the site pages with rich content types
- Widgetized sidebar and footer
- Freedom to choose between full-width template and default page template
- Ships with Customizable off-canvas menu plugin
- Ships with page-order plugin
- Supports SEO plugins for your website search engine optimization

## Installation -- Local

1. Down and extract the WordPress project (from [wordpress.org](http://wordpress.org)), renaming it to your project name, in this case 'stylista', and dumping the extracted folder in the document root of your local web server.
2. Launch a browser and Go to <http://localhost/phpmyadmin>
3. Create a database called 'stylista'
4. Run the project installation by going to <http://localhost/stylista>
  - Enter your database details and run the install
  - After installation, sign in into the dashboard with your username and password just created.
5. On the dashboard, goto Appearance->Themes
  - Click on the Add New button as seen below to install the Reverie Theme first! (See the themes folder from the package or Distro), and then install the Stylista Theme next.
  - \* The Stylista Theme rests on the Reverie Theme which is its parent theme.

-- Activate the Stylista Theme as the current theme.

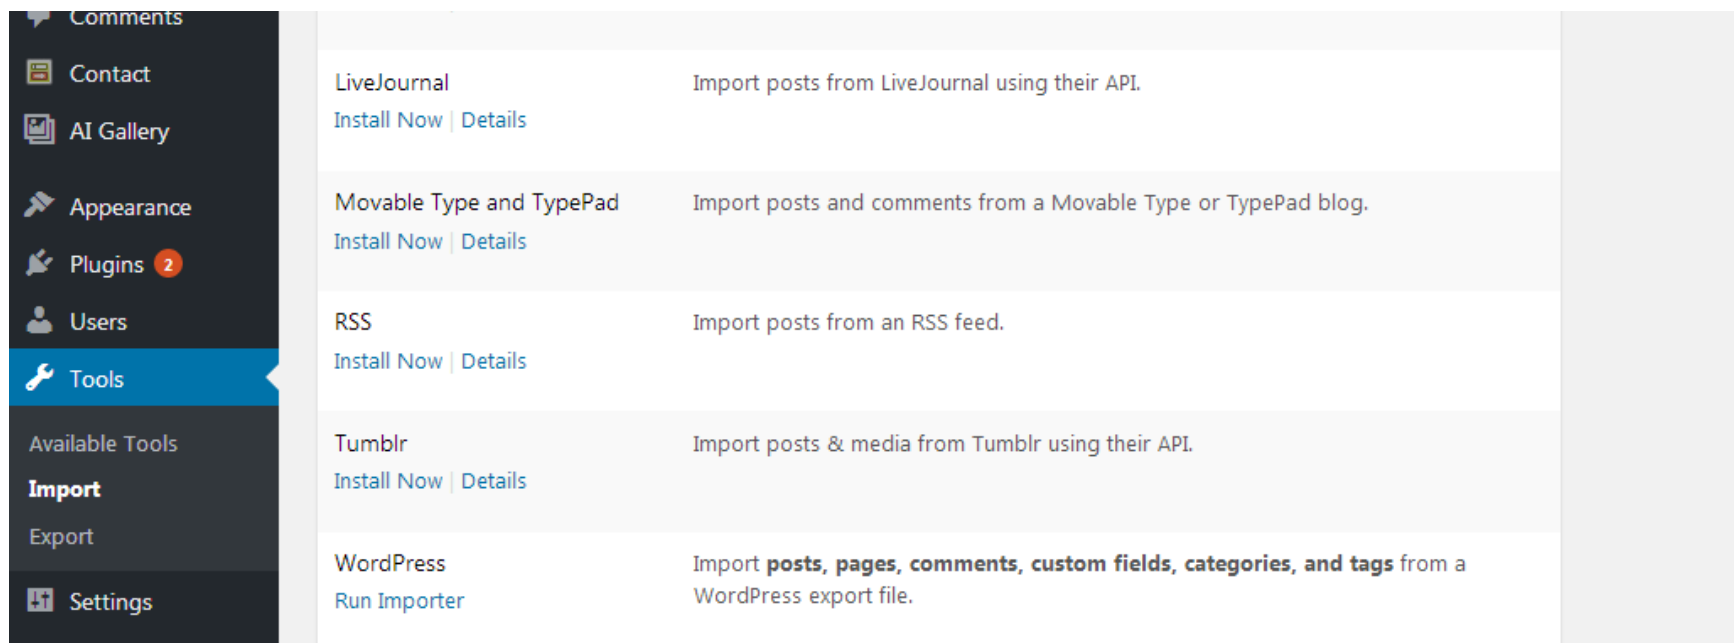

The screenshot shows the WordPress dashboard with the 'Themes' section active. The left sidebar contains navigation links: Dashboard, Posts, Media, Pages, Comments, Appearance (highlighted), Themes, Customize, Widgets, Menus, Background, Editor, Plugins (1), Users, 8Degree Fly Menus Lite, Tools, and Settings. The main content area displays a grid of themes. The 'Stylista' theme is marked as 'Active' and has a 'Customize' button. Other themes shown include 'Reverie', 'Twenty Fifteen', and 'Twenty Sixteen'. A large plus sign in a circle is visible on the right side of the dashboard.

6. On the dashboard, goto Plugins->Add New

- Install all plugins shipped with the Stylista Theme Distro
- Activate all installed plugins

7. From the Dashboard, goto Tools->Import

--under WordPress, Click on Install Now then after the install, Run Importer to import the stylista.xml file from the Stylista Theme Distro.

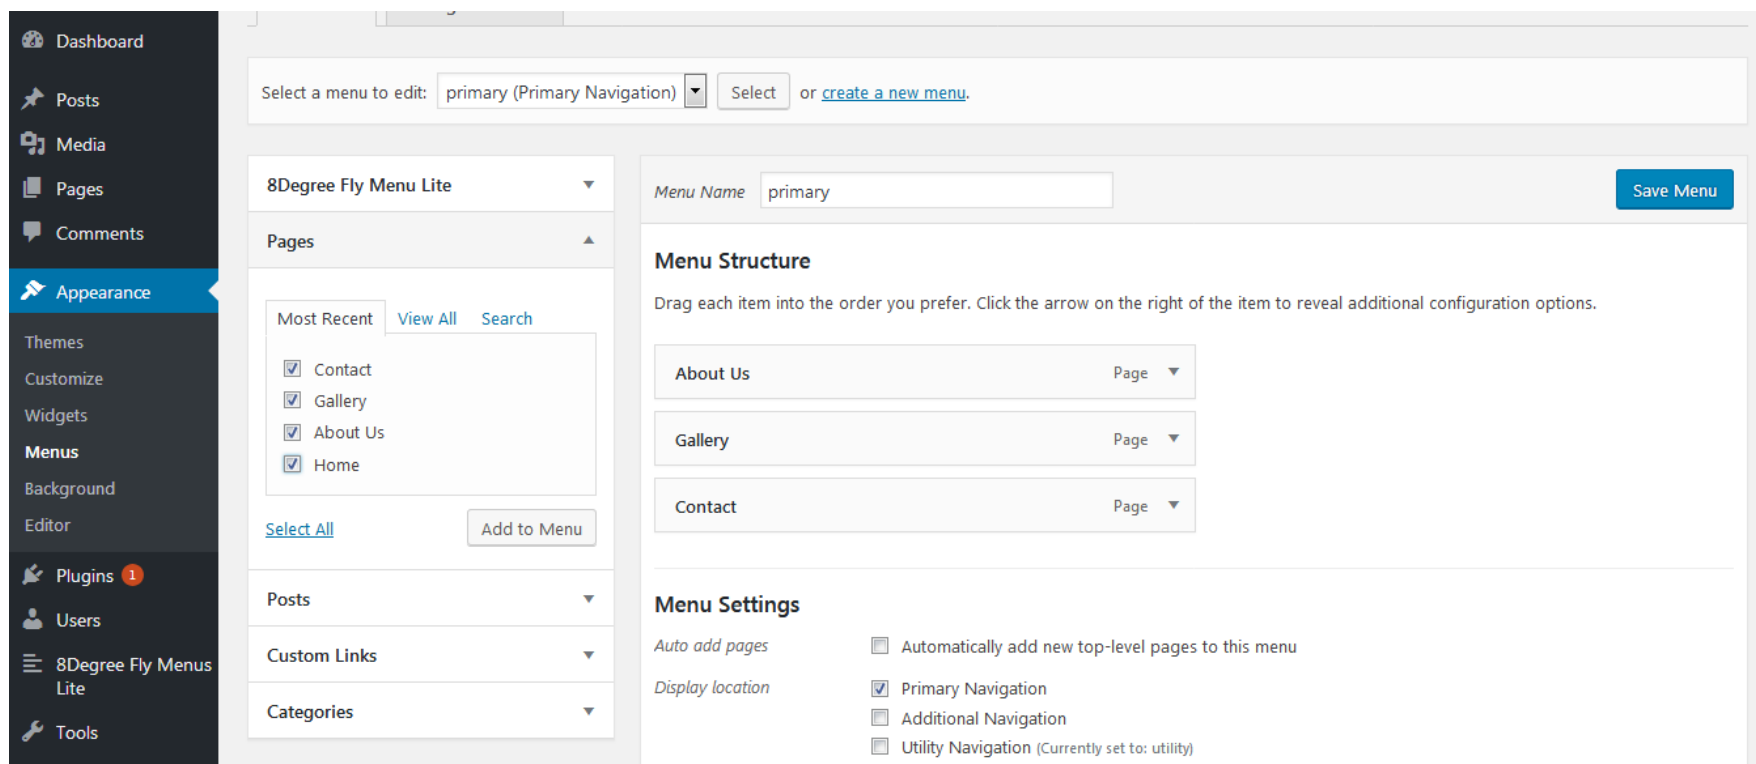

8. See the front end to see the progress, <http://localhost/stylista>

## Primary Navigation

9a. To get the navigation showing up, first goto Appearance -> Menus

-- create a 'primary' menu and add the menus to it, checking the primary navigation menu as seen below.

9b. Goto Appearance ->Customize

Note \* -- Your website logo can be uploaded from under the 'Logo'

-- and the website favicon, under the 'Site Identity' option .

## Home Background Image

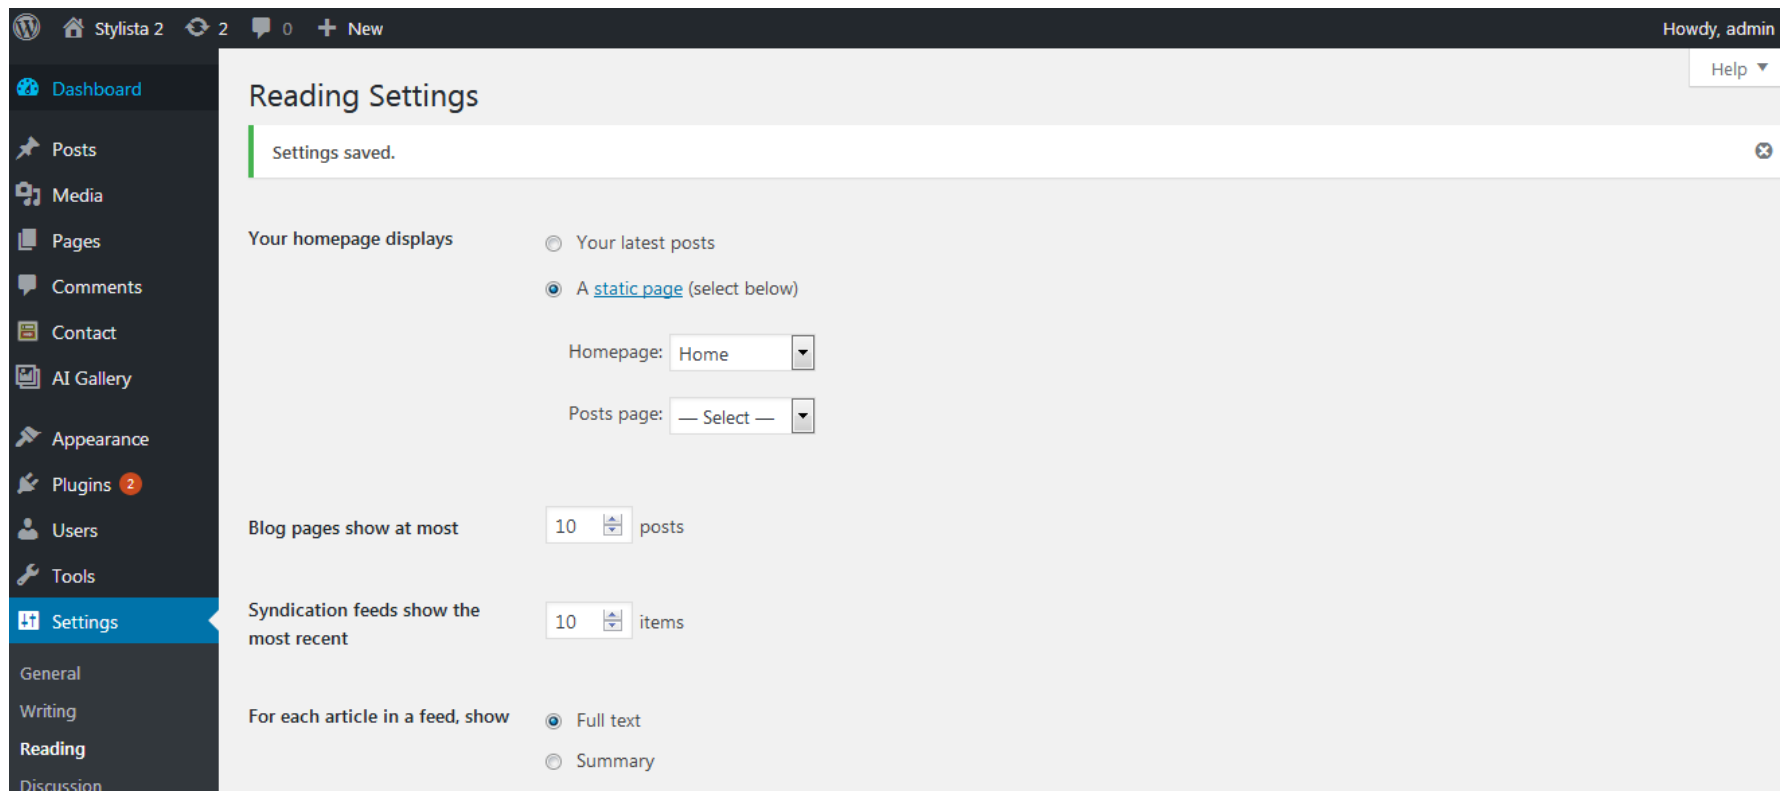

10. Appearance -> background

## Final Checks

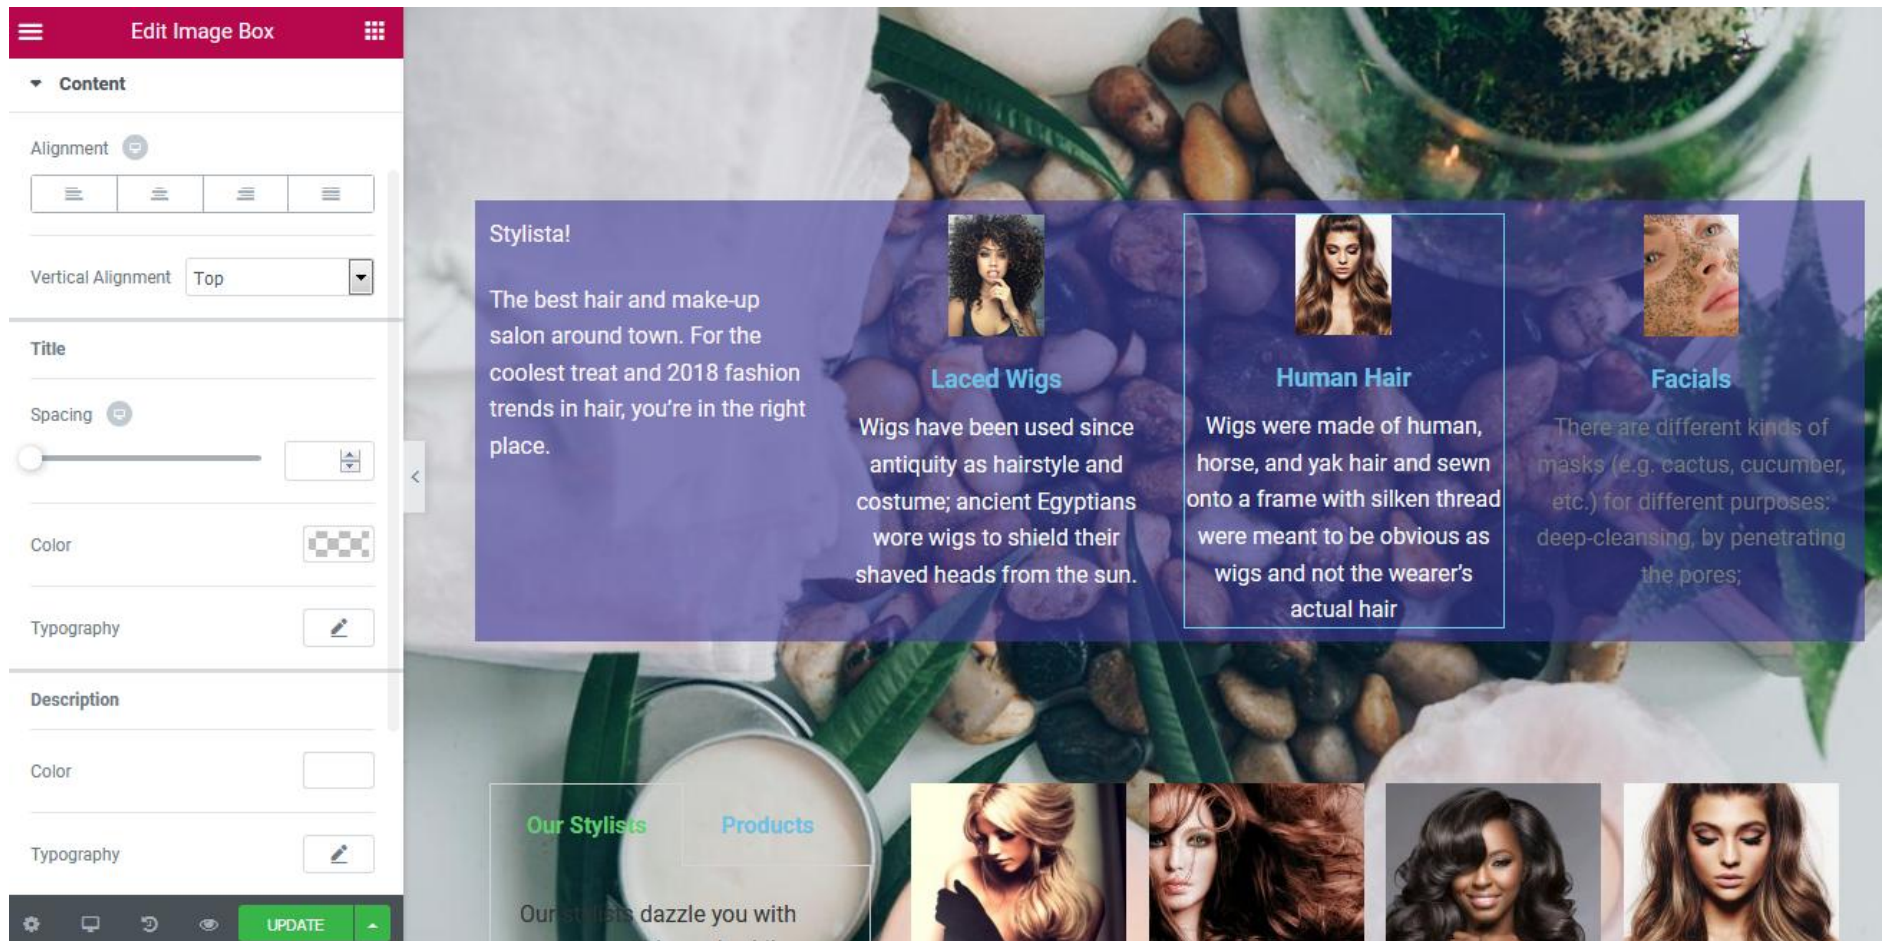

11. From the WordPress dashboard, goto Settings -> Permalinks and choose a setting other than the plain or default settting. Save your changes
12. From Settings -> Reading, under Your homepage displays, choose A static page and activate the 'Home' page. Save your changes.

12. Develop content for your pages using the Elementor page builder. Choose the Edit with Elementor to begin.

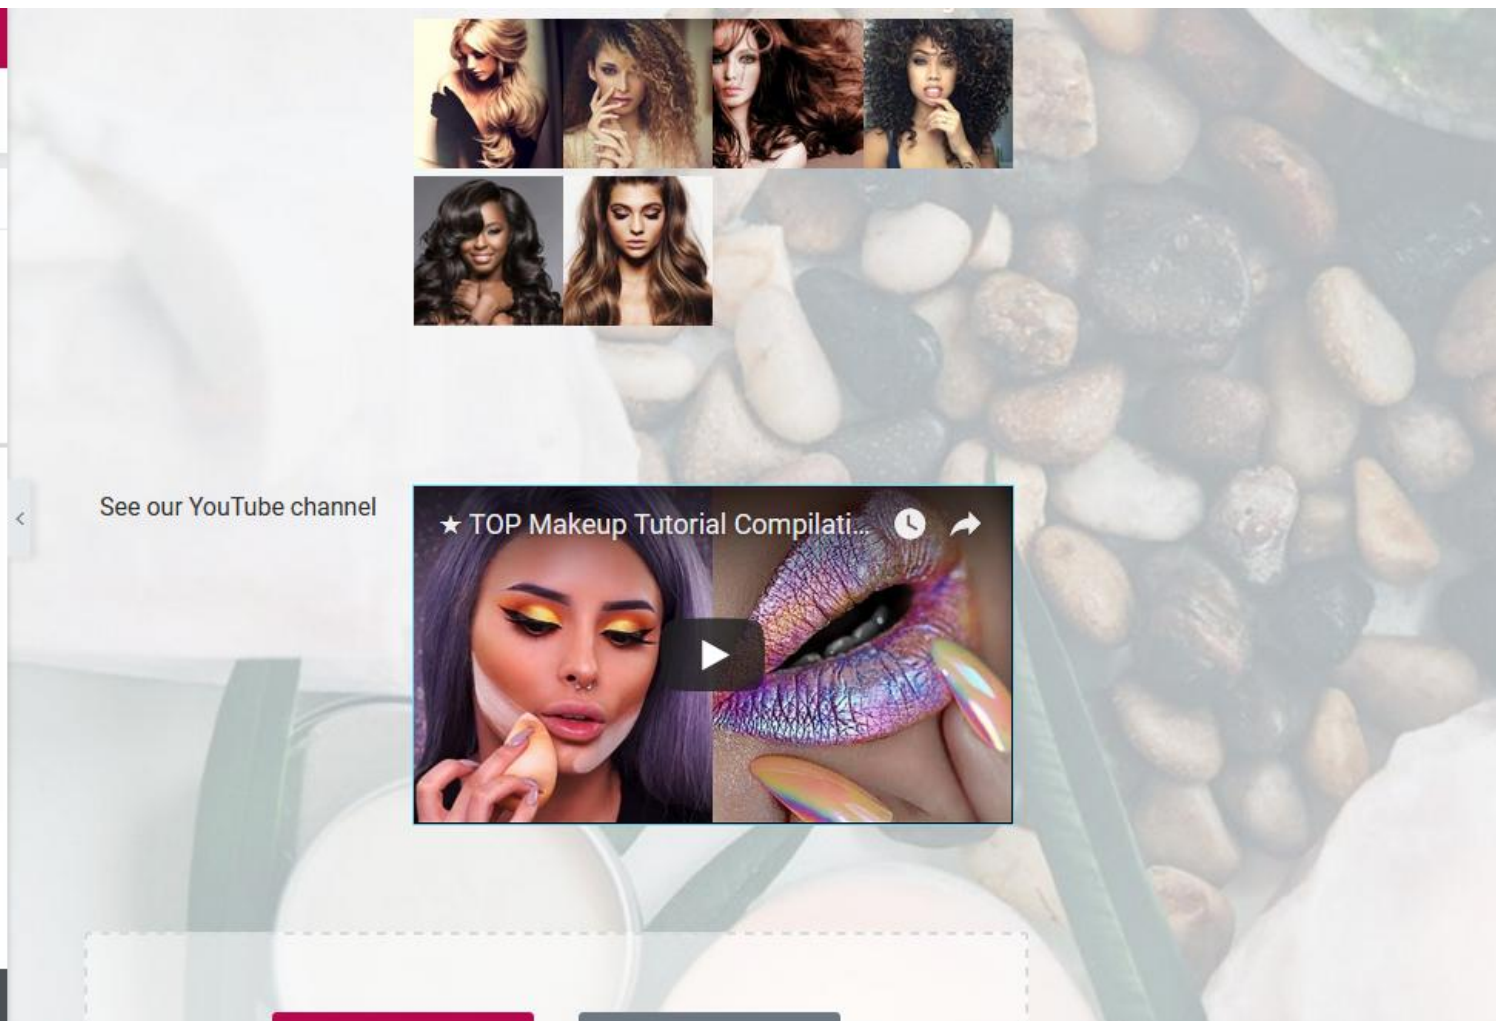

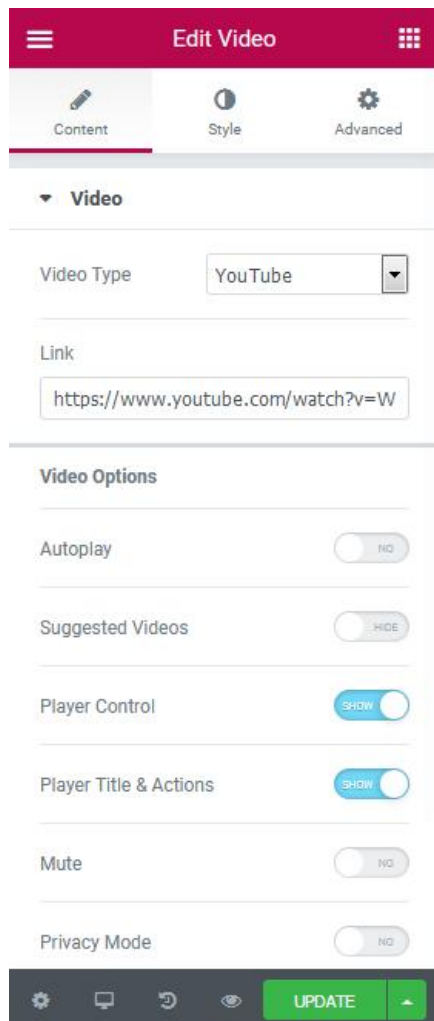

The screenshot displays the WordPress dashboard interface for editing a page. The top navigation bar shows the WordPress logo, a home icon, the site name 'Stylista 2', a refresh icon, a comment count of 0, a '+ New' button, and a 'View Page' button. The left sidebar contains a menu with the following items: Dashboard, Posts, Media, Pages (highlighted), All Pages, Add New, Comments, Contact, AI Gallery, Appearance, Plugins (with a red badge showing '2'), Users, Tools, Settings, and Elementor. The main content area is titled 'Edit Page' and includes an 'Add New' button. Below the title, the page name 'Home' is shown in a text box, followed by the permalink 'http://localhost/styl/'. A button labeled '← Back to WordPress Editor' is positioned below the permalink. The central area of the page is a large, empty box with a prominent blue button labeled 'Edit with Elementor'. The right sidebar contains a 'Publish' section with the status 'Published', visibility 'Public', and a note about 5 revisions. Below this is a 'Move to Trash' link. The 'Page Attributes' section includes a 'Parent' dropdown set to '(no parent)' and a 'Template' dropdown set to 'Full Width'. An 'Order' label is visible at the bottom of the right sidebar.

## Using the 8Degree Fly Menu Lite

The screenshot shows the WordPress dashboard with the 8Degree Fly Menu Lite plugin settings. The left sidebar contains navigation links: Posts, Media, Pages, Comments, Appearance (highlighted), Themes, Customize, Widgets, Menus, Background, Editor, Plugins (1), Users, 8Degree Fly Menus Lite, Tools, Settings, Elementor, and Collapse menu. The main content area has two tabs: 'Edit Menus' (active) and 'Manage Locations'. Under 'Edit Menus', there's a dropdown to 'Select a menu to edit:' with 'primary (Primary Navigation)' selected, and a 'Select' button or a link to 'create a new menu.'. Below this, the '8Degree Fly Menu Lite' section has a checkbox 'Use as flymenu?' checked, followed by instructions: 'Please check here to make primary work as 8Degree Fly Menu. Checking this will enable you to configure fly menu item settings. Click save after adding new menu items to get fly menu options for that item.' To the right of these instructions are expandable sections for 'Pages', 'Posts', 'Custom Links', and 'Categories'. On the far right, the 'Menu Name' is 'primary' with a 'Save Menu' button. Below that is the 'Menu Structure' section with the instruction 'Drag each item into the order you prefer. Click the arrow on the right of the item to reveal additional configuration options.' It lists three items: 'About Us', 'Gallery', and 'Contact', each with an '8Degree Fly Menu Lite' button and a 'Page' dropdown. The 'Menu Settings' section at the bottom includes 'Auto add pages' (checkbox unchecked) and 'Display location' (checkbox checked for 'Primary Navigation', with 'Additional Navigation' and 'Utility Navigation (Currently set to: utility)' also listed).

Auto add pages ☐ Automatically add new top-level pages to this menu

Display location ☒ Primary Navigation ☐ Additional Navigation ☐ Utility Navigation (Currently set to: utility)

Using the 8Degree Fly Menus Lite - Make sure to set a menu position(e.g Primary) under the Select Fly Menu option shown above.

## Widget positions

The screenshot shows the WordPress 'Appearance' > 'Widgets' screen. The left sidebar contains navigation links: Pages, Comments, Contact, AI Gallery, Appearance (selected), Themes, Customize, Widgets, Menus, Background, Editor, Plugins (2), Users, Tools, Settings, Elementor, and Background Slider. The main area is titled 'Widgets' with a 'Manage with Live Preview' button. It lists 'Available Widgets' in a grid: Archives, Audio, Calendar, Categories, Custom HTML, Gallery, Image, Meta, Navigation Menu, and Pages. Each widget has a brief description. On the right, three widget areas are shown: 'Footer Aside 1' (containing 'Pages'), 'Footer Aside 2' (empty), and 'Footer Aside 3' (containing a 'Gallery' widget). The 'Gallery' widget in Footer Aside 3 displays a grid of images including L'Oréal Paris, head & shoulders, Carol's Daughters, VED, and Dove. It includes a 'Title:' field, an 'Edit Gallery' button, and 'Delete' and 'Save' links. At the bottom right, a 'Sidebar' widget area is visible.

WordPress dashboard interface showing the Widgets management screen. The left sidebar lists various site management options: Pages, Comments, Contact, AI Gallery, Appearance (selected), Themes, Customize, Widgets, Menus, Background, Editor, Plugins (2), Users, Tools, Settings, Elementor, and Background Slider.

The main content area displays the Widgets management interface. It includes a 'Manage with Live Preview' button and a list of Available Widgets:

- Archives: A monthly archive of your site's Posts.
- Audio: Displays an audio player.
- Calendar: A calendar of your site's Posts.
- Categories: A list or dropdown of categories.
- Custom HTML: Arbitrary HTML code.
- Gallery: Displays an image gallery.
- Image: Displays an image.
- Meta: Login, RSS, & WordPress.org links.
- Navigation Menu: Add a navigation menu to your sidebar.
- Pages: A list of your site's Pages.

On the right side, there are three widget areas:

- Footer Aside 1: Contains the Pages widget.
- Footer Aside 2: Empty.
- Footer Aside 3: Contains the Gallery widget, which displays a grid of images (L'Oréal Paris, head & shoulders, Carol's Daughters, VED, Dove) and includes an 'Edit Gallery' button and 'Delete' and 'Save' links.

At the bottom right, there is a 'Sidebar' widget area.

### Available Widgets

To activate a widget drag it to a sidebar or click on it. To deactivate a widget and delete its settings, drag it back.

<b>Archives</b> A monthly archive of your site's Posts.	<b>Audio</b> Displays an audio player.
<b>Calendar</b> A calendar of your site's Posts.	<b>Categories</b> A list or dropdown of categories.
<b>Custom HTML</b> Arbitrary HTML code.	<b>Gallery</b> Displays an image gallery.
<b>Image</b> Displays an image.	<b>Meta</b> Login, RSS, & WordPress.org links.
<b>Navigation Menu</b> Add a navigation menu to your	<b>Pages</b> A list of your site's Pages.
